

# Hoofcount

## STANDARD FOOTBATH

At up to 3m long, this wider, Custom made bath is manufactured and installed to sit snugly within your exit race, ensuring that **EVERY** cow dips **EVERY** hoof twice **EVERY** time they step through the bath.

Each bath is fitted with hard wearing rubber flooring to maximise cow comfort.

Using a separate valve for flush and fill, the bath empties through a **FULL WIDTH** opening door, effectively cleans and refills within 3 minutes.

Simple and consistently reliable the **HOOFCOUNT** Footbath is effective and easy to run.

### The Bath:

- › Fully automatic with manual over-ride facility
- › 2 chemical pumps as standard for alternative chemicals
- › Full Marine grade, folded stainless steel construction to prevent chemical damage
- › No electric pumps or unnecessary moving parts, reducing maintenance/servicing costs

### Customer Testimonials...

*"Since installing the HOOFCOUNT Footbath in my 2 Robot milking system, Mortellaro (digital dermatitis) is completely gone from the herd. It's a great job, very easy to use, no lameness issues this year. Delighted I bought this bath. Definitely give it 5 stars"*  
Willie Gilligan, Drumraney, Athlone, Co. Westmeath

*"I have seen a big decrease in lameness, especially in my heifers. I had a big problem with Mortellaro over the years and it's nearly gone from the herd, after only one month foot bathing. Very lame cows are now much better. I should have bought one 10 years ago!"*  
Sean Prenderville, Ratoath, Co. Meath.

*"We have had limited Mortellaro after 3 weeks of foot bathing using the HOOFCOUNT System. Very lame cows have significantly improved. Very easy on labour and a big time saver. Works away itself, very reliable and I'm delighted I bought HOOFCOUNT!"*  
Ray Kealy, Slane, Co. Meath

*"Since installing the HOOFCOUNT Footbath, foot conditions have improved and there has been a decrease in lameness. It's simple, reliable and does what is says on the tin. I'm very happy with the product"*  
Denis & Joe Lucey, Ovens, Co. Cork

## FOOTBATH FOR YOUR ROBOT SYSTEM

Hoof care should be a priority in any Robot barn.  
Healthy cows make more frequent visits to a Robot system.

Used everyday the **HOOFCOUNT** system allows  
chemical rates to be kept to a minimum.

On a Robot Milking System, the cows may make several  
visits to the Robot in any 24 hour period and therefore  
rules out the need to use a longer bath.

A **HOOFCOUNT** Footbath can be made any length  
you require, with most requesting  
the 2.5m or 3m standard bath.

A **HOOFCOUNT** Bath  
can fit perfectly onto:

- › Head to Head
- › Individual

## EXCEL - FOOTBATH FOR PARLOURS

At 3.6m long and made slightly deeper than the Standard  
Hoofcount Bath, the **EXCEL BATH** allows 3 dips per hoof  
each time the cow passes through the bath.

This narrow bath holds less water and chemical  
- reducing running costs.

Empties, cleans and refills within 3 minutes.

Strong Stainless Steel side sheets keep any splash-back  
in the bath and ensure that **EVERY** cow dips  
**EVERY HOOF EVERY STEP**.

The **EXCEL BATH** can be fitted into any race  
and works in exactly the same way as  
the Standard Hoofcount Bath.

This is a perfect option for Rotary  
milking systems, rapid exit parlours  
and larger herd numbers.

Simple and consistently  
reliable the **HOOFCOUNT**  
Footbath is effective  
and easy to run.
